

TEOSYAL® PURESENSE

Redensity [II]

TEOSYAL® PURESENSE REDENSITY [II]: A DIFFERENT GEL DESIGNED FOR EYE CIRCLES

TEOSYAL® PureSense Redensity [II] is a major TEOXANE innovation in eye circle treatment. This unique hyaluronic acid-based gel was created to answer **the most significant aesthetic concern for patients: eye circles**¹. TEOSYAL® PureSense Redensity [II] is specially designed to treat dark hollow circles, tear trough, palpebromalar groove and minimal palpebral or malar bags.

Its sophisticated formula combines a mix of cross-linked and non cross-linked hyaluronic acid with a 15mg/g concentration. Therefore its **rheological profile** is particularly adapted to the fragile eye circles area as it **decreases the risk of swelling**²:

- **Low Hygroscopic behavior:** thanks to a combination of cross-linked and non cross-linked hyaluronic acid at 15mg/g concentration.
- **Light gel for low pressure on the tissues.**
- **Ideal viscoelasticity for optimal spreading and positioning capability:** reducing risks of edema, for a natural and homogenous correction.

This innovative 3-in-1 formulation also includes a **Patented Dermo-Structuring Complex**³, to improve skin quality², as well as **lidocaine**, a local anesthetic to provide maximum comfort to the patient.

During the first session, under-correction is recommended (no more than 0.5ml for each eye circle) and a touch-up session can be scheduled one month later, only if necessary.

Over 80,000 patients have been injected with TEOSYAL® PureSense Redensity [II] since its launch in 2012 and an international clinical trial demonstrated that the global aesthetic result had improved to much improved according to 90% of practitioners (cf. GAIS: Global Aesthetic Improvement Scale)². This multicenter trial proved the product **efficacy and safety**² - with an average injected volume of 0.475ml by side - which leads to an unmatched patients' satisfaction: **9 patients out of 10 would recommend TEOSYAL® PureSense Redensity [II]. With TEOSYAL® PureSense Redensity [II], the promise of a safe, natural and long lasting correction for eye circles is fulfilled.**

"The tear trough has always been considered a difficult region to treat; both for its intrinsic nature and due to the difficulty in finding materials that are less hydrophilic. TEOSYAL® PureSense Redensity [II] can be used safely to achieve good results in this challenging area."

Giuseppe Sito, M.D. and
Patrizia Piersini, M.D.*

About TEOXANE Laboratories

TEOXANE Laboratories were established in Geneva in 2003 and are specialized in the design and manufacture of hyaluronic acid-based dermal fillers. As a result of its uncompromising commitment to innovation, quality and patient satisfaction, TEOXANE is now among the top three hyaluronic acid-based dermal fillers manufacturers in the world with products in more than 80 countries.
